| Program and Project Management | ✓ Personnel management as line- and project responsible with up to 90 FTE. |
| | ✓ Responsibility for budgets and results up to MCHF 22. |
| | ✓ Program Manager for the implementation of a global information platform for drug discovery (>20 FTE). |
| | ✓ Deputy Project Manager for a corporate chemical database project. Management of international project team (10 FTE), responsible for |

system architecture and data migration.

**Process
Management &
Organizational
Development**

- ✓ Development and implementation of proprietary quality system which adheres to the needs of the regulated industry Conception and implementation of GxP corporate property quality system which which adheres to the needs of the regulated industry.
- ✓ Implementation of Logica group standards, processes and procedures including implementation of group ERP, hour tracking system, reporting, controlling, budgeting and quality system.
- ✓ Planning and organization of talent development program.

**Performance
Measurement**

- ✓ Implementation of Logica group financial, project, portfolio and forecasting processes and tools.

**Compliance
Management**

- ✓ Development and implementation of proprietary quality system
- ✓ Project assistance and method consulting of several software validation projects (GxP).

**System
Development**

- ✓ Requirements analysis, specification, design, implementation, testing, training, deploying and maintenance of IT systems using various design and development tools and database products.

METHODS AND TOOLS**Project
Management**

- ✓ Experienced in the Methods, Summit-D, HERMES and Cortex.

**Process
Management &
Organizational
Development**

- ✓ Team building, moderation and presentation techniques
- ✓ Documentation of procedures with SOPs, TOPs
- ✓ ITIL, CMM, roles models

**Compliance
Management**

- ✓ Guidelines: ISO 9000, GAMP4
- ✓ Regulations: FDA/EMEA, GxP
- ✓ Software Quality Management

**System
Development**

- ✓ Analysis- and creativity techniques: Brainstorming, mind maps
- ✓ System Development Life Cycle Models: V-model, Summit-D, HERMES, Agile techniques
- ✓ System specification: OOA/OOD, SADT, ERM
- ✓ Testing: strategies, planning and execution, traceability

INDUSTRIES

- ✓ Life Sciences (pharmaceutical and biotech)
 - ✓ Transportation
 - ✓ Machine
 - ✓ Finance
 - ✓ Government

Implementation of group ERP, hour tracking system, reporting, controlling, budgeting and quality system. Harmonization of working contracts, pension funds and all other benefit schemes.
Year / Duration	2006-2007	
Service	-	
My role	Responsible Manager	
Subject area	Company Merger	Integration and turnaround of former Swiss German Unilog business unit. Implementation of Unilog standards, process and procedures.
Year / Duration	2001-2002	
Service	-	
My role	Responsible Manager	
Subject area	Drug Discovery	The aim of the project was the corporate-wide harmonization of business processes and the selection and introduction of a global software package for reagent management in drug discovery of a multinational Pharmaceutical company.
Year / Duration	1999/ 4 month	
Service	System harmonization	
My role	Business Analyst	
Subject area	Telecom	Engaged as an external consultant by a multinational Telecom System provider in Sofia Antipolis (F) for the development of a new family of telecom products (billing, cell broadcasting). A main task was the design and implementation of a very flexible and high performance configuration manager for network components (up to hundreds of thousands). Extensive successful collaborations in a multinational team of engineers.
Year / Duration	1997-1998/10 month	
Service	System Development	
My role	Senior Consultant	
Subject area	Drug Discovery	Engaged by F. Hoffmann-La Roche AG, to lead project teams with more than 20 project managers, engineers and subject matter experts. Program steering with scientist (chemists, biologists) representing all disease areas and research sites in Switzerland, United Kingdom, US and Japan. Involved in the negotiations for the global licensing contracts for the underlying software platform. Cross platform development on Wintel and Apple clients and on Open-VMS and Unix servers. Involved in the implementation of software distribution tools for Wintel and Apple
Year / Duration	1994-1997	
Service	System Development	
My role	Program Manager	

platform. Global roll-out to 1'500 scientists.

Subject area	Drug Discovery	Extensive evaluation of novel tools for the management of chemical information (drawing, registration, exchanging and complex searching). The study was aimed to lead to the identification of a new corporate platform for chemical information.
Year / Duration	1993-1994	
Service	Product Evaluation	
My role	Senior Consultant	
Subject area	Drug Discovery	Corporate Chemical database project. Management of international project team in CH, UK and US. Large, complex and highly sensitive data migration of heterogeneous databases and datasets from various sites and affiliated companies. Design of failover tolerant and self supporting data-exchange between two master sites in CH and US. Introduction of a project methodology (Summit-D). Highly complex and delicate user management.
Year / Duration	1992-1993	
Service	System Development	
My role	Deputy Project Manager	
Subject area	Preclinical Development	Responsible for the global marketing and sales of the Bioanalytical Laboratory Information Management System KinLims. KinLims was a shared development of F. Hoffmann-La-Roche AG and Datasign AG für Informatik.
Year / Duration	1990 - 1998	
Service	Product & System Development, Marketing & Sales	
My role	Product & Team Manager	
Subject area	Preclinical Development	Responsible for the global marketing, sales and implementation of the Toxicokinetic Laboratory Information Management System ToxKin. ToxKin was a shared development of Boehringer Ingelheim KG and Unilog AG.
Year / Duration	2002 - 2005	
Service	Product & System Development, Marketing & Sales, Implementation	
My role	Product & Team Manager	
Subject area	Drug Discovery	Responsible manager for the product family of Chemical Sample Management Systems which have been developed and distributed in partnership Tecan/Remp. The customer base includes most of the large European Life Science companies.
Year / Duration	1994 - 2005	
Service	Product & System Development, Marketing & Sales, Implementation	

My role	Responsible Manager	
Subject area	Pharma Production	Responsible manager for the Galenic Manufacturing Execution System tailor made for F. Hoffmann-La Roche AG.
Year / Duration	1998 - 2005	
Service	System Development	
My role	Responsible Manager, Account Manager	
Subject area	Clinical Development	Headed a team of consultants in the area of Clinical development. Most have been long-term assignments on projects such as Clinical Trials Management, Clinical Data Management, Remote Data Entry, Clinical Monitors Management and others.
Year / Duration	1998 - 2005	
Service	System Development	
My role	Team Manager
